

aprendia®

aprendIA is an **AI-driven chatbot** platform delivering **personalized learning** experiences using messaging platforms that crisis-affected communities have access to **anytime, anywhere**, and on **any device**.

Challenge:

224 million school age children are affected by crises globally.

- **72 million** are out of school.
- **127 million** are in school, but not learning.
- **25 million** are in school and are achieving minimal proficiency.

The Vision:

Children impacted by crisis will receive **personalized learning quickly**.

This will provide continuity of learning and increase reentry into formal school settings post-crisis.

Our Approach:

Respond cost-effectively and at scale:

Leverage technology and AI, support existing education programs, achieve efficiencies of scale, and support overstretched education systems.

Quick response: Deploy learning within 30 days or less of the onset of crisis.

Improve learning outcomes:

Comparable to what would have been achieved if a learning disruption had not occurred.

Join us on the **aprendIA journey**.

Together, we will make education **universally accessible to all**.
